Lunations and Long-term Aspects

The New Moon on October 7 occurs in fellow Air Sign, Libra, your 5th House of creativity, romance, children, entertainment and speculation. Watch for something new to come your way in one of these areas. This will be most noticeable if your birthday is between June 4 - 6. Saturn and Mercury are in that house as well, lending an air of seriousness, though the implications are also that you will have the discipline and information available to put it to good use, particularly if it's a creative endeavor. Thus, this is an excellent time to get something started in this part of your life.

Mars and Venus are conjunct in Scorpio, your 6th House of work, health and pets. This implies that interactions with members of the opposite sex with regard to your work or health will be more intense. Those born between June 3 - 7 are likely to encounter a change of course that relates to this in some manner. This would be an excellent time to start a project with your significant other as well.

Pluto is well-established in Capricorn where he's now into the long-haul; the retrograde periods will no longer take him back into your polar sign, Sagittarius. Capricorn is your 8th House which comprises transformations, death and regeneration (both physical and figurative death), shared resources, debt and sex. It's worth noting that prior to Freud sex was included in the 5th House along with romance, but clearly there are different types of sex and our reaction to those types of experiences. (I just thought I'd throw that in, knowing how Gemini's love data.) If your birthday is between May 23 - 25 you are likely to encounter something that affects you strongly which motivates you to change directions or make a few adjustments.

Pluto is making a couple of rather wide squares, one of which is particularly sloppy since it's also out of sign, but I'll point them out for what they're worth so you can watch for them. One hails from your Sign Ruler, Mercury, over there in Libra as noted earlier. This implies that news or information related to that 5th House matter has a transformation effect on you. Thus, whatever goes on over there may affect you deeper than you realize at the time. Pluto is also squaring Uranus, who's conjunct Jupiter, in Pisces, your 10th House of career, reputation, status and public image. If your birthday is around June 17 - 20, those two are squaring your Natal Sun and could cause some disruptions or issues in that part of your life which will result in a challenge or issue to deal with which you didn't expect. Both are retrograde, internalizing their energy, so this could even be on the mental plane. Maybe you'll reach your limits with something and decide to make abrupt changes. Jupiter retrograde commonly relates to ethics in some way or your core beliefs, so an issue is likely to arise unexpectedly that causes a stir and ultimately a transformational experience or perhaps even debt or an examination of your shared resources.

The Full Moon on October 22 is in Aries, your 11th House of groups, friends, networking and goals. If your birthday is within a day or so of June 21 this should bring an opportunity your way due to the fact that your Natal Sun will form a Triangle of Potential with the lunation. This is a favorable aspect pattern which puts you in the driver's seat with regard to an opportunity and other advantages that will come your way. This is interesting in view of the potential for issues with your career, status, reputation of public image noted earlier. If that occurs it appears that your networking and creativity will show the way out. Mercury has moved into Scorpio, facilitating information with regard to your work, though you may not like everything you find out. A change of course is highly likely with your status, whatever that may be, but taking action is highly favored and you should have plenty of energy and drive to get it started along with some inspiration as well. Be cautious, however, with regard to any beliefs or expectations, which may not materialize so get everything possible in writing and if you can't then it's best not to count on it.
