On the following page is your AstroLocality Report. An astrological analysis of what you are likely to experience in the cities and towns that you selected is given. The astrological influences that are strongest begin with three asterisks (***) and appear at the beginning of the report. Next are the influences with one asterisk (*), which are strong but not as important as the astrological influences that have three asterisks. The astrological influences with no asterisks are at the end of report and are weakest, but they are also significant in your life.

The AstroLocality Report uses astrological methods developed through the latter half of the 20th century, and refined through extensive research, some of which is described in the book "AstroLocality Magic".

Balancing your own needs for structure and stability with creativity and freedom is a theme you encounter here, and if unresolved, can lead to considerable stress.

Your AstroMap

Your AstroMap shows geographic areas where you attract certain kinds of situations. For example, in one geographic area you may find that job opportunities are better, and in another area you may find that you are able to have a happy and fulfilling home and family life.

On the AstroMap are lines with a blue tint surrounding them. Areas where the blue tint is strongest are the areas where the astrological influence is strongest. The astrological influences varies from the dark blue tint (strongest influence) to a very pale blue (weakest influence). Therefore, you should go to the area of darkest blue color to get the maximum intensity of the astrological influence.

An area with no blue tint has no particular "astrological boost". This does not mean that life is unexciting or uneventful in these areas; it simply means that there is no particular emphasis in that geographic area.

You should use common sense when studying your AstroMap. For example, some people love cities and some prefer a rural setting. You may prefer a region of the country that has natural beauty, or perhaps a highly educated public, or perhaps a strong artistic community. Some people have a particular love for a particular kind of environment, perhaps mountains, or ocean, or a tropical climate and atmosphere or perhaps a rugged environment with cold winters and mild summers. The culture, natural environment,

architecture, and available resources will have a huge effect on your response to a particular geographic region. Astrological influences will not negate the importance of these factors.

However, some people are surprised to find that in a particular town they encounter the kind of people and life style that they enjoy, while another town that seems similar does not prove to be as attractive or comfortable. Two people with similar tastes and life style may have very different reactions to Chicago, or London, or Tokyo or anywhere else. Astrology often explains what otherwise is difficult to understand.

Note also that astrology is not fatalistic. It is up to you to utilize the energies available to you in the best possible way. Astrology can help you better understand what kinds of energies underlie your present situation, and thereby help you to take the right steps to improve your life. Wise use of the energies available to a person can make it possible to get a positive result from the most challenging astrological influences.

If there are many blue-tinted areas on your map, it may not be obvious to you that there are lines drawn though the map with the dark blue color close to this line and gradually becoming fainter as you move away from this line. If you follow these lines to the edge of the map you will see astrological symbols drawn in a light yellow or pink oval-shaped area. Locate these astrological symbols on the pages below to see what the astrological influence means. In the description of these astrological influences we frequently emphasize what you can do to utilize the astrological influence to best advantage. As we said earlier, astrology is not fatalistic and should never be an excuse for failure or problems in your life. You have the ability and opportunity each day to express the energies available to you in new, creative, positive life-enhancing ways.

Some symbols have a number between the 2 glyphs of the planets. If the number is 20, 80, 100, 140, or 160 it will not appear in the list of symbols below, but it has the same meaning as the number 40. Here is a list of numbers that do not appear in the list of symbols below, and the number in the symbol with the same meaning:

40 is the same as 20, 80, 100, 140, and 160

72 is the same as 36, 108, and 144.

51-26 is the same as 25-43, 77-09, 102-51, and 154-17.

Areas of intensity on your AstroMap are very sensitive to accuracy of birth time. On average, a difference of 1 minute in the time of birth can move the astrological influence about 15 miles in an east-west direction. Because it is very possible that your birth time can be inaccurate by a few minutes, you may find that the AstroMap can pinpoint the towns and cities that are most suitable for you, but you must rely on your own intuition to guide you to the most suitable areas within that town.

Your AstroMap is based on the most sophisticated and accurate astrological techniques available. These astrological influences have not yet been scientifically verified and astrology is a very controversial subject, but we do believe that there is validity to this

map, and we hope you find it useful.
