Sun in Cancer:

Cancer - Key words: The Heights of Heaven and the Depths of Hell, usually both at the same time.

"How dare you tell me I'm paranoid, and just so you know it, I know the bathrooms are bugged at work", says the confident Cancer. Mr. or Ms. Cancerian, do the world a favor and stop telling people you love them all of the time! God, that is annoying, once a week is more than enough! Go in the kitchen and bake if you are feeling distressed, it's the same energy, different demonstration of affection, get it?

Wanna have some fun with a Cancerian native? All you have to do is criticize them. Then stand back and watch them become unglued at the seams. Watch them head for the refrigerator or Burger King. It's Carbohydrate time! Remember to buy extra cheese or keep it on hand for such occasions. Cancerians can go through cheese by the pound, and it doesn't matter what kind!

Cancerians are the masters of misdirection and inadmissible evidence, as they have it down to a science. Everyone knows (at some point) that they have them nailed for doing something sinister now and then, they just can't prove it, or put their finger on how they got away with it, no matter what the circumstances.

Cancerians most positive attributes are: Spying and blackmailing and at the drop of a hat, they will worry about anything and everything.

Before marrying a Cancerian, check the umbilical cord to see how close to mommy they are, there may still be a direct connection no matter what the age.

Cancerians are the ones whose desks are always neat and tidy! When it comes to money however, their hands can resemble lobster claws as they reach out for what is theirs.

The Cancerian's greatest attribute to an employer is the ability to fire people. They just love it, especially when people have to be cleared out by high noon or face a showdown. Other positive Cancerian traits is the capacity for jealousy and possessiveness above and beyond the call of duty.

All signs have the ability to abuse things, and in the Cancerians case it is any form of dairy product (CHEESE!). Cancerians absolutely love anything that will carbohydrate themselves into a false sense of security.

Moon in Cancer:

The Emotions - This is what I really need to be complete.

Moon in Cancer people are extremely sensitive to their surroundings, and they can cry at the drop of a hat, but they will even cry if you pick up a hat. Their constant need to

mother others can make you barf after awhile. Moon in Cancer natives can be very psychic but on a bad day when the wiring gets wet, all they get is static, probably Lawrence Welk or David Bowie doing "ground control to major Tom . . ."

Moon in Cancer natives experience tremendous highs and lows in moods and expressing themselves, probably all at the same time. In love making they can express these disturbances through beating up their lovers, and then taking care of them, nursing them back to health. This should serve to balance their warped emotional swings. For these Moon in Cancer people, old relationships never die, they just keep adding new people to the list or their own personal phone book.

There are two truly distinct operating modes for the Moon in Cancer person. Either they make absolutely no damn sense OR they are totally overwhelming when laying ideals, or emotions on you. There is nothing in between to base reality on, but you are free to give it a try.

All signs have the ability to abuse things, and in the Moon in Cancer's case it is any form of dairy product, primarily CHEESE! They absolutely love anything that will carbohydrate themselves into a false sense of security. "If you don't love me, I know a hunk of cheese that will appreciate me!", says the insecure and oversensitive Moon in Cancer! When they are emotionally unhappy, this is the first line of defense for improving self worth and confidence. Be careful what goes into your tummy when you are unhappy Cancer natives, as food can provide pleasure or extreme discomfort when feeling low.

When you marry or court this Moon in Cancer native, expect to have the phone line embedded somewhere in their body which is directly attached to a receiver on their mothers person somewhere.

If you want to have a great time with a Moon in Cancer native, just think something hurtful about them without actually verbally doing so, and they are good for a sulk until the cows come home. They can sense you've said something, but can't prove it. Sit back and watch the Paranoia set in, and expect lots of brooding, because that is their second most positive attribute. Hey, you have to give Moon in Cancer natives a little slack however, because they are tuned in psychically to all the space garbage that is in the air every moment of the day. After awhile, you'd be a bit buggy too!

Mercury in Gemini:

Mercury represents the thought process and what the mind sends to the body. Mercury rules how we communicate, what we talk about, and what we think about. Bearing that in mind, here is what they are apt to think and talk about.

With this placement, they should have been born a computer, as the mind just works, works, works. Find a way to shut it down and take a laxative break. No one should have to think this much. To be, or not to be! Who cares! Get the picture buckaroo? Overwork

is gonna burn out the old porch light! Stop eating those el cheapo lunches just so you don't have to go out at lunch time. Eat real food!

The Gemini mind is always in an overactive state, and to see a Gemini filling out expense vouchers can be like reading Heckle and Jeckle, a comedy of errors. If they had as many arms as an octopus, they could do so much more. Think of all of the real big foul-ups they are capable of making!

Toys of all kinds are important to them, and when it is their turn to meet their maker, the score will be 1-0 in their favor for owning the most. Their phone bill is likely to be equal to a Mortgage payment, month after month, after month.

"I love sex, I can sit and think about it all day!" says Mercury in Gemini. They are the originators of talking during sex, and an example would be: " UW, that's nice, . . . so how was your day at the office?" Another example would be "Lets video tape our lovemaking so I can critique it later". This is the person who wakes up their partner and "asks them" if they want to make love. Take the initiative! Don't ask them, live out a fantasy!

Love making for them is yelling at the top of their lungs so that the neighbors can hear "Yes, I want to make love, now the whole world knows . . . and maybe they can watch too!"

This placement is responsible for the phenomena known as phone sex. These are the people who call unsuspecting victims up on the phone and say "I want to"

Okay, Okay, tell me if you have heard this one: "What does a Gemini think about during love making?" "Everything!"

Venus in Leo:

Venus defined is: Romance, the action that brings satisfaction. Food, flowers, little chubby people shooting arrows, fertility, and lots of groveling. Here is how the art of love is interpreted by this placement of Venus:

This sign has the emotional response of a wall switch and just as exciting. They can be compassionate and demonstrative when they want to be, and calculating sometimes in what they wish to acquire.

The woman of the species must be admired, cherished, and complimented on every aspect of her being, and then some.

Men of the species usually lay enough compliments on you to make you barf and feel good about it afterwards. Love that satisfies the ego side of the self belongs to Venus in Leo.

People with this placement are demonstrative and will probably try to seduce you while acting out Romeo & Juliet, or some other kinky invention or intention.

Excitement is the key for these people. Have you ever tried making love while hand gliding or swinging from a chandelier. The more expensive display these people can put on to get you in the mood, the better and it seems the head waiter always knows these people, whether they have been in the restaurant before or not.

Mars in Aries:

Mars defined: "It's get down and dirty time". Raw passions unleashed upon suspecting and non suspecting persons. Actions desiring prompt and equal reactions of any kind. To get very specific, this is how this great bundle of energy is used in the personal natal chart. This is how that energy interacts with their surroundings.

This is where this native finds their true strength. If you are smart, you will tranquilize them before lovemaking, otherwise there will be very unattractive skid marks on the sheets where they come in for a landing. Even with the tranquilizers, expect the sensitivity of a mountain lion in heat. They are quick on the old trigger and premature in everything, I mean EVERYTHING!

Aries has all the love making gracefulness of a cannon firing a 2000 pound shell at a target 100 miles away, missing it and spaying a sheep, guarded by a shepherd minding his own business, who must now explain this strange occurrence to his narrow-minded father.

Mars in Aries has the ability to make love while playing cops and robbers or cowboys and Indians. All of that up and down and giddy yup motion melts them like a meadow muffin.

A minimum of foreplay saves the day here. "I'm not shallow, I just need sex!", says Mars in Aries. Never tell an Arien to slow down during love making, because first of all it isn't in their vocabulary and secondly, slowing down will be like trying to stop an anchor from falling, it can't be done.
